

PATIENT INFORMATION FOR SERUM TEARS

Your physician has prescribed Serum Tears for your use. Serum Tears are prepared from each patient's own serum in a sterile environment to prevent contamination, infection, and bacterial growth. The prescription you will receive will be prepared under sterile conditions by a licensed pharmacist and technician and tested to verify that it is sterile. We adhere to the most stringent policies and procedures to provide the highest quality preparations. We use the highest quality ingredients and devices.

The following information will aid you in obtaining and caring for your personalized Serum Tears prescription.

You will be sent to a lab to have some of your blood collected.

We will pick up the serum and bring it to the pharmacy in order to prepare your Serum Tears.

PLEASE ALLOW 24-48 HOURS FOR THE PREPARATION OF THE SERUM TEARS ONCE WE HAVE IT.

Our staff will contact you as soon as it is ready.

The medication is dispensed in individual syringes allowing for application of drops into the eye.

The medication can be stored in one of three places:

Freezer for 6 months

Refrigerator for 4 days

Room temperature for only 24 hours

Please bring a cooler with you to the pharmacy when you pick up your prescription in order to keep it cold.
